NETFLIX AFTER HOURS

GO-TO-MARKET & FEATURE ROLLOUT STRATEGY

Launch Target: Q2 2027
Target Audience: Late-Night Viewers

1. MARKET POSITIONING & VALUE MESSAGING

Positioning Statement: For millions who rely on streaming to unwind, *Netflix After Hours* is the world's first intelligent, circadian-aligned streaming environment. Unlike passive streaming that wastes bandwidth and ruins episode continuity, After Hours adapts to your sleep rhythm—fading gently into the night and preserving your exact watch history.

> **Core Marketing Tagline:** *"Stream softly. Never lose your place again."*

2. PHASED ROLLOUT STRATEGY

PHASE 1: Q1 2027

Closed Beta

100,000 Premium subscribers across US & Nordic regions. Focus on tuning audio fade algorithms and validating Apple Watch/Oura API sleep triggers.

PHASE 2: Q2 2027

Global General Availability

Rollout manual sleep timers and dimming profiles across all TV, mobile, and web clients globally for all tier levels.

PHASE 3: Q3 2027

Monetization Engine

Activate targeted Premium upgrade prompts for Standard tier users attempting to enable Audio-Only background mode or Smart Wearable sync.

3. MULTI-CHANNEL CAMPAIGN MATRIX

Channel	Campaign Hook / Content	Target Audience & Objective
In-App Bedtime Banner	Contextual prompt appearing past 11:00 PM local time: *"Heading to sleep? Try Night Mode."*	Active late-night viewers on mobile and TV apps. Drives initial feature discovery.
Wearable Partnership	Co-marketing campaign with Apple Watch and Oura: *"Your watch now knows when to pause Netflix."*	Tech-savvy wellness enthusiasts. Position Netflix Premium as a health-aligned subscription.
Social & Creator Ads	TikTok / Instagram Reels showing humor behind waking up 6 episodes ahead vs. using After Hours.	Gen-Z / Millennial dual-screen sleepers. High virality potential on relatable sleep habits.

4. GO-TO-MARKET RISK MANAGEMENT

- **Risk: User perceived feature locked behind paywall.**
  Mitigation: Emphasize that core manual timers and screen dimming are 100% free across all plan tiers, keeping utility accessible while reserving automation for Premium.
- **Risk: Low awareness of night controls in dark environments.**
  Mitigation: Trigger a one-time ambient onboarding tooltip when a user opens the player between 11 PM and 2 AM.
